Harrop Fold School

MAKING THE DIFFERENCE

8th September 2014

To whom it may concern,

Aaron Kent has been working with us here at Harrop Fold for the past 2 years as part of his Elevate Youth Company.

Aaron's approach to engaging difficult to reach students has already had a very positive effect; his calm and dignified manner is just one facet of the good role model he sets for students who find main stream education challenging at times. Students learn to respect themselves and others and how to avoid mistakes made in their conduct and attitude when interacting with others, both in the classroom and in the wider school environment.

Aaron has a flexible approach and develops bespoke programmes with each individual. He is methodical in recording evidence to back up the sessions he has with each student and regularly meets with me as his line manager to discuss progress and the 'next steps' in the package he provides. Aaron also visits parents and carers in order to understand individual needs more closely and to receive feedback on how each young person is progressing during the programme.

I would not hesitate to recommend the services of Elevate Youth and of Aaron in particular. He is both professional and approachable at all times and would be a great asset to any company employing his services.

Yours faithfully,

J. York
